DETAILED ACTION

1. In response to the Communications dated March 22, 2002 through May 28, 2002, claims 1-9 are active in this application.

Foreign Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a) (d), which papers have been placed of record in the file.

Information Disclosure Statement

3. The information disclosure statement filed May 28, 2002 has been considered.

Claim Objections

4. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections – 35 U.S.C. § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2818

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

6. Claim 1 is rejected under 35 U.S.C 102(e) as being anticipated by Palagonia et al. [U.S. Patent #6,037,661].

With respect to claim 1, Palagonia et al. discloses, in figures 1 and 2, a semiconductor memory chip module [10] comprising a first memory chip [12] of a first type, a second memory chip [14] of a second type, and an electric connection [16] between the first and second memory chips wherein the memory chips are disposed one above the other in different levels and connected by vertical chip interconnections.

Allowable Subject Matter

7. The following is an Examiner's statement of reasons for the indication of allowable subject matter: the prior art of records does not show (in addition to the other elements in the claim) a semiconductor memory chip module comprising a first memory chip of a first type, a second memory chip of a second type, and an electric connection between the first and second memory chips wherein the memory chips are disposed one above the other in different levels and connected by vertical chip interconnections,

Art Unit: 2818

wherein at least one further chip is provided in a further level which contains decoder circuits or an energy buffer.

Conclusion

8. When responding to the Office action, Applicants are advised to provide the Examiner with line and page numbers of the application and/or references cited to assist the Examiner in the prosecution of this case.
